Projects

Lambda Door(Team of 4)

Apr. 2020 to May 2020

The one-stop portal for Lambda graduates looking for company information in the quest for a job.

Built using: React | Redux | NodeJS | Express | CSS | HTML | Styled-components

Replate(Team of 5)

Jan. 2020 to Feb. 2020

Many businesses have leftover food at the end of the day. Replate is an easy to use app that lets them effortlessly have those extras picked up by a Replate volunteer and donated to one of our worthy partner organizations.

Built using: React | Redux | REST API | HTML | CSS | LESS

Game of life(solo project)

June 2020 to June 2020

The game of life is a cellular automaton imagined by John H. Conway in the 1970s and is probably, the best known of all cellular automata. Despite very simple rules, the game of life is Turing-complete and deterministic.

The game takes place on a two-dimensional finite or infinite grid whose cells can take two distinct states: "alive" or "dead".

Built using: React | React Hooks | LESS | HTML | CSS
